Subject: Pre-incident levels on Gold King Mine

Hi David -

I was looking through the spreadsheet data that you guys posted on the water test results. I didn't see anything on the spreadsheet to indicate what pre-event levels were for that testing area. Do you have a place that you could point me to for that data?

Also, what are the EPA's concern about the high levels of chlorides that are still present in the water? Won't that affect aquatic life?

Thanks!

Lana
